

Plasma-Tec can machine, spray, turn, and grind: ceramics, carbides, and most metals and alloys. Examples include:
shafts • shaft sleeves • wear casings • pistons • plungers • crosshead • pony rods • idler pins • shafts • sleeves • rotors • and more!

Making **metal components last longer** in harsh, corrosive, industrial environments...

It's what we've done for 35 years.

PRECISION
Machining
Turning
Grinding
Coating

We specialize in machining, turning, grinding, and coating components that are 1" to 8" in diameter and up to 60" in overall length.
